

Know where your vehicles have been

Benefits

GPSTrackP is a powerful tracking system. Using advanced GPS technology, this system allows you to track the whereabouts and activities of your vehicles and drivers.

GPSTrackP is a productivity tool. You can plan the optimal delivery route to each customer service request received. You can also keep control of fuel costs and attendance billing.

GPSTrackP is user friendly. The software interfaces are self-explanatory and the hardware is easy to install. Anyone with the basic knowledge of computers can operate the system at ease.

GPSTrackP is cost effective. You only need a small investment and are guaranteed to enjoy limitless savings.

Hardware

GPSTrackP eases your following concerns:

- What are the drivers doing during the day
- Are the drivers adhering to the planned routes
- Are the drivers entering unauthorized zones
- Do the drivers deliver services and goods to the customers on time
- How long do the drivers stay at the customer sites
- Are the vehicles being abused
- Are the drivers speeding and where
- Are the drivers wasting gas and time in finding customer locations

GPSTrackP can:

- optimize trips according to customer locations
- monitor driver activities by checking adherence to scheduled routes and stops
- easily manage drivers, vehicles, customers, and devices
- display trip details on street maps with different marks for different activities
- generate standard and customized trip reports

Features

GPSTrackP only needs:

- an in-vehicle GPS data logger with an embedded or external antenna

Software

User Friendly Windows Environment

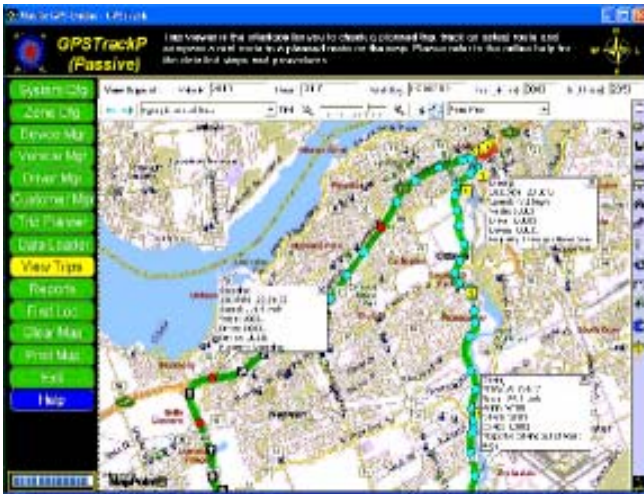

- Handy functional menu bar
- Spacious map area
- Comprehensive tool bar
- Task-oriented tip field
- Tab through fields fast and conveniently
- Optimized information layout with all related data on one page
- Embedded calendar for time selection
- Various search criteria

Accurate Tracking

Detailed trip profile and map view

- Track and view vehicle location and status on detailed street map
- Graphic markers to illustrate driver activities
- One mouse click to get detailed activity information
- Compare preplanned route with the actual route to check deviations
- Powerful tools for zone definition and marking special spots

Data Reporting

Standard and customized reports

- Generate reports and graphs in Microsoft Word and Excel
- 19 categories of data for reporting
- Easy to add customized reports
- Easy to add extra data for business analysis
- Easy to save and print out generated reports

Customer Visits Report
