

## 13 Track and manage your mobile workers efficiently

### Benefits

GPSTrackRT is a powerful tracking system. Using advanced GPS technology, this system allows you to track, dispatch and manage your vehicles and mobile workers efficiently.

GPSTrackRT is a productivity tool. You can plan the optimal delivery route to each customer service request received. You can also keep tracking driver's adherence to the planed routes.

GPSTrackRT is user friendly. The software interfaces are self-explanatory and the hardware is GPS phones. Anyone with the basic knowledge of computers can operate the system at ease.

GPSTrackP is cost effective. You can make a full use of cell phones for most efficient management of your mobile workers.

### Mobile GPS Online

38 Constable Street  
Nepean, Ontario, Canada  
K2J 3E5  
Tel: (613) 823-0926  
sales@mobilegpsonline.com

### GPSTrackRT eases your following concerns:

- Where are the drivers or mobile workers now
- Are they adhering to the planned routes
- Are they entering unauthorized zones
- Do they deliver services and goods to the customers on time
- How long do they stay at the customer sites
- Who is the nearest person who can serve the next customer
- Are the drivers speeding and where
- Are the drivers wasting gas and time in finding customer locations

### GPSTrackRT can:

- track mobile workers online
- plan and optimize delivery routes according to customer locations
- monitor workers activities by checking adherence to scheduled routes and stops
- easily manage drivers, vehicles, customers, and other assets
- display trip details on street maps with different marks for different activities
- generate standard and customized trip reports
