

Pocket PC (PPC) CF Bluetooth Setup

Step 1

Insert the Compact Flash Bluetooth receiver into the Compact Flash card slot on your Pocket PC.

Step 2

Turn on your TN-206 and Pocket PC, and on your Pocket PC, perform a Bluetooth device discovery. Please refer to the user documentation of your Pocket PC for instructions

Step 3

Start your GPS software on your Pocket PC. Make sure that the software is set for the COM port that your Pocket PC will use for serial communication and it is pointing to TN-206 as its GPS receiver.

Now you should be ready to use your GPS software as directed by the user documentation that came with the software. More configurations may apply.

(For other devices besides Pocket PC, please refer to TN-206 User's Guide for instructions.)
